SUMMARY

MCA graduate (Cloud Computing) with 5+ months internship experience building full-stack web applications using Python and Django. Skilled in RESTful APIs, MySQL/SQLite, Docker, AWS EC2, and CI/CD pipelines. Strong in OOP, MVC architecture, and unit testing. Seeking an entry-level Software Engineer or Backend Developer role.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks: Django, React.js, ASP.NET, Bootstrap, Django REST Framework

Web & APIs: RESTful APIs, CRUD, JWT Authentication, HTML5, CSS3, MVC Architecture

Databases: MySQL, SQLite, SQL Server, Query Optimization, Indexing

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Azure, Docker, Kubernetes, Jenkins, CI/CD

Testing & Tools: PyTest, unittest, Git, GitHub, Postman, Agile/Scrum, Tableau, Power BI

INTERNSHIP EXPERIENCE

Software Engineer Intern — Ecoders, Bengaluru

Apr 2023 – Aug 2023

- Architected and delivered a full-stack College Management System using Python (Django) and SQLite, handling end-to-end development — Django ORM models, RESTful API endpoints, and Bootstrap UI — reducing manual admin workload by ~60% for 200+ users.
- Enforced OOP principles and MVC separation across a 3-developer shared codebase, eliminating merge conflicts; wrote 30+ PyTest/unittest cases covering API endpoints and optimized SQL queries with indexing, cutting page load time by ~25%.

Software Testing Intern — QSpiders, Bengaluru

May 2025 – Oct 2025

- Designed and executed 80+ test cases spanning functional, regression, and UI layers following STLC/SDLC; achieved zero critical defect escapes to production across assigned modules.
- Identified and logged 40+ defects with detailed reproduction steps in a bug-tracking system; collaborated directly with developers to resolve P1/P2 issues within 24–48 hours, improving release quality and cross-team communication.

PROJECTS

IT Club Event Management System | Django · SQLite · Bootstrap · HTML5

- Built a role-based event management platform supporting 4 user types (Admin, Faculty, Student, Club Member) with Django's built-in auth, CRUD event registration, and normalized SQLite schemas — reducing data retrieval time by ~30% through query optimization and indexing.
- Implemented server-side input validation and structured error handling, achieving zero data corruption incidents during college-level usage; applied clean MVC separation for maintainable, extensible module design.

IT Inventory Management System | Django · SQLite · JavaScript · PyTest

- Developed a Django-based IT asset tracking system managing 100+ assets with full CRUD operations, a RESTful API layer, and one-click PDF/Excel export — eliminating manual spreadsheet tracking and saving ~3 hours/week of admin effort.
- Achieved 90%+ PyTest coverage on critical business logic modules; enforced clean architecture using Django's MVC pattern, making the codebase extendable for future integrations.

Django DevOps Deployment | Docker · AWS EC2 · Nginx · CI/CD

- Containerized a production Django application using Docker and Docker Compose, deployed on AWS EC2 with an Nginx reverse proxy — achieving stable public access with zero downtime during testing phase.
- Implemented a CI/CD deployment pipeline reducing manual deployment steps by ~70%; managed full Linux server setup including networking, environment variables, and security configuration from scratch.

EDUCATION

MCA — Cloud Computing | GPA: 8.0/10 | Surana College, Bengaluru

2023 – 2025

Coursework: AWS, GCP, Azure, Docker, Kubernetes, Microservices, Distributed Systems, CI/CD

BCA | GPA: 7.8/10 | Surana College, Bengaluru

2020 – 2023

Coursework: DSA, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

CERTIFICATIONS & RESEARCH

Full Stack Web Development – Python & Django | Software Testing – QSpiders | Data Visualization – Tableau & Power BI

Research Paper – National Conference, Kristu Jayanti College
